A FormFinder, Self Training Device

Training device forces the hurdler into correct body position. Keeps hurdlers arm movement in. Makes hurdler bring trail leg under armpit. Self-training allows coach to spend time with other events. Cloth cross-braces are Velcro® attached which break-away easily upon contact by hurdler. Uprights are powder coated steel.

UPS SHIPPABLE 2 BOXES - 1 @ 21 LBS., 1 @ 12 LBS.

B Mini Training Hurdles

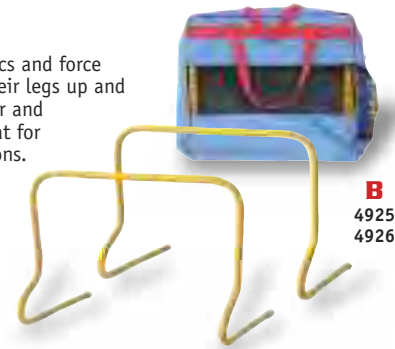

Essential for teaching recovery mechanics and force application. Athletes learn to “snap” their legs up and down for maximum power output. Linear and lateral drills as well as plyometrics. Great for all sports, improves speed in all directions. Use 12” for linear running mechanics, 6” for lateral and change of direction speed. Hurdles are bright yellow to stand out against any background. Comes with storage bag.

E Hurdle Sweep™ 3” + Fixture

Hurdle Sweeps™ are a soft brush edge along the top of the hurdle which provide instant technique feedback. The athlete receives tactile and audible feedback - and a coach gets visual and audible information. Interchangeable brush (sweep) provides a 3” edge over the top of the actual hurdle board. The 3” sweep can be used as an actual height when the hurdle is set one notch down. **(Hurdles not included.)**

**★ PROMOTES ★
“SQUARE AND
CENTER ATTACK!”**

F Hurdle Sweep™ Target Basic Set

Target training sweeps are used for several drills. Use the Target sweeps to give the athlete a specific area to attack each hurdle with a lead leg target, trail leg target or one for each leg. Target Sweeps™ can also be used where you intend the athlete to feel feedback because they should encounter contact with the sweep — or they can be used where you want the athlete to avoid an area of the hurdle (like the inside edge on the curve to prevent hooking) in which case the athlete should not encounter any contact with the Target Sweep. Target Sweeps™ on each side of the hurdle promotes “square and center” attack. Size: 2 x 5”. 2-Fixture attachments. **(Hurdles not included.)**

**★ FUN & BENEFICIAL! ★
INCREASES SPEED & STRENGTH!**

Safety Sleeve Elastics Protect your athletes, protect yourself. Limits maximum safe stretch distance. If elastic breaks, it will coil inside sleeve preventing injury. Protects elastic from wear from roads, track ... etc. Protects from overexposure to latex material. The product that uses the Safety Sleeve elastic is #4017. (Patent Pending).

**Always inspect resistance cords for wear before every workout and replace at least every 2-years. Goggles are recommended when using resistance cord devices.*

**NEVER stretch cord more than 3-times its length.*
